

David M. Rothenberg, MD, FCCM

The Max S. Sadove, MD, Professor of
Anesthesiology

Advancement of Medicine

We continue to strive for excellence in our Anesthesia Preoperative Evaluation Clinic, with 2024 marking another year of a unique preoperative telemedicine experience for our presurgical patients with complex medical conditions. Patient satisfaction with this service is excellent, and I look forward to another successful year of patient care.

I continue to take an active role in resident and departmental education by actively teaching in our clinic and organizing our weekly Grand Rounds lecture series. I also continue to serve the institution as a member of our Conflict of Interest, or COI, Committee.

As an associate dean, I ensure that all of Rush Medical College's affiliation agreements meet the standards of all regulatory agencies and provide academic advice to those residency programs looking for external sources of education and training when warranted.

Research

I have been asked by members of the Rush Department of Orthopedic Surgery to assist in a research project designed to assess the degrees and causes of postoperative hyponatremia in patients undergoing total joint replacement. Preliminary data is already being considered for publication.

Publication Highlights — Abbreviated

- "Acute Acid-base Disorders" in *Comprehensive Critical Care: Adults* (3rd ed). Society of Critical Medicine. Published.
- "Kidney Function and CPB," in *Cardiopulmonary Bypass and Mechanical Support: Principles and Practice* (5th ed.) In preparation.

The Year Ahead: 2025 and Beyond

I will continue to expand the Anesthesia Preoperative Evaluation Clinic and evaluate its effectiveness in improving perioperative outcomes.

With Gratitude

I am deeply appreciative of your support. It has been an honor to represent this endowed professorship in the name of **Max S. Sadove, MD**, and to keep his memory alive as a pioneer and leader in the field of anesthesiology.
