**Mediterranean Eating Pattern for Americans (MEPA) III Questionnaire**

Answer the following questions about how often you eat foods or drink beverages each day, each week, or each month. Write the number (whole numbers only) of servings in the box below that corresponds to the number of times you eat that food either in a day, a week, or a month. The amount of food for one serving is listed in parentheses after each question. If you do not eat that food, put a “0” in any box below the day, week, or month option.

For example, let’s say you eat ½ cup of blueberries twice a week. You would complete the frequency column as shown to the right.
