Objectives

- Review the diagnostic work-up and surgical management of pediatric neck masses.
- Understand specific measures to mitigate risks related to malpractice in otolaryngology.
- Review the updated Clinic Practice Guidelines on tympanostomy tubes in children.
- Discuss differences in pediatric vs. adult polysomnography and understand management of difficult cases, specifically obese and medically complex children.
- Comprehend the workup and management of salivary gland neoplasms.
- Review the office based evaluation and intervention for thyroid nodules.
- Improve patient selection for hypoglossal nerve stimulation by understanding key factors for therapy response and compliance.
- Interpret collapse patterns observed during drug-induced sleep endoscopy and their impact on clinical decision-making.
- Describe the timing, indications, and techniques for surgical scar revision.
- Review the diagnostic and medical management of acute facial nerve paralysis.
- Appreciate the various surgical methods to treat structural nasal obstruction.
- Discuss operative techniques for reconstruction of defects after Mohs cancer resection.
- Review options for OTC hearing aids.
- Highlight new indications and techniques in cochlear implantation.
- Understand diagnosis and management of AERD.
- Review management of polyps in the era of biologics.
