Identifying the need for Alternative Text

2. An image without alternative text will be highlighted [1]. The sidebar will display an explanation of the issue [2]. If the image is decorative and does not require alternative text, select **Decorative Image** [3].

The screenshot shows a document editor interface with a menu bar (Edit, View, Insert, Format, Tools, Table) and a toolbar (12pt, Paragraph, Bold, Italic, Underline, Text Color, Background Color, Bulleted List, Numbered List). A blue-tinted image of a healthcare team is highlighted with a black border and a circled '1'. Below the image is a table with five columns: Occupational Therapist, Nurse, Physician, Speech-Language Pathologist, and Respiratory Therapist. The Accessibility Checker sidebar on the right shows 'Issue 1/3' with a question mark icon. The issue description is 'Image filenames should not be used as the alt attribute describing the image content.' Below this is a 'Change alt text' field containing 'download.jfif'. A circled '2' points to the issue description. At the bottom of the sidebar, the 'Decorative image' checkbox is highlighted with a red box and a circled '3'. Other options include 'Prev', 'Next', and 'Apply' buttons.

Occupational Therapist	Nurse	Physician	Speech-Language Pathologist	Respiratory Therapist
